INTRODUCTION

PROFILE

Acme commercial ways was established in 1960. Acme people are driven by heart felt interest in healthcare, wherever their locations, what ever their positions and responsibilities, all share a genuine desire to understand and help the hospital and medical communities they serve.

Acme commercial ways is one of the premier manufacturers of Surgical Instruments worldwide. Originally formed with the goal of producing Surgical Instruments for Surgery and specialty needs with exceptional design, engineering, high value and pleasing aesthetics, the company moved forward rapidly from the very first instrument manufactured, Acme set new bench mark for innovation and features new to the industry with in a few short years, the product line grew to broad array.

Today Acme poised for growth in the 21st century. Our aim is to provide high quality and reliable products to the healthcare community.
Acme is a company for people who cares and intend to set the standard of 21st century healthcare.
We look forward to providing the medical community with unmatched sales, services and support.

VISION

Acme people are passionate about advancing the science of surgical instruments. We succeed become we intent a learning more recognizing we can never know enough. Our customers will recognize us as the leading global supplies of quality surgical instruments and selected products. Leadership will result in superior market share and financial performance.

MESH TRAYS

Our mesh trays produced from high quality chromium nickel steel 18/10, processed without generating burrs and polished electrolytically. The uniform system material allows washing programmes to be standardised. Dispensing with covers and edges makes cleaning easy and economical. Various different supplementary elements and individual attachments complete the product range.

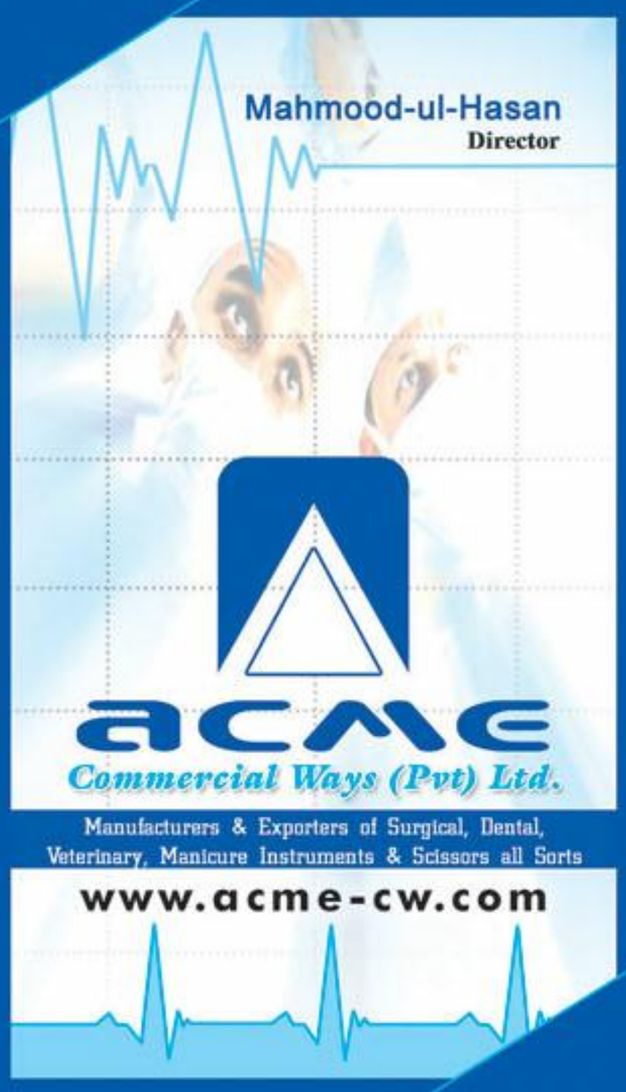

*Tray system can be equipped with different accessories for strong instruments.

*Stainless steel wire containers are also available.

*Mesh baskets can be used individually for storage & transportation.

QUALITY ASSURANCE

Acme has long been accustomed to working in a regulated world with regards to markets,products, and production. This fact was recognized by the decision to certify the quality control systems of each of our business units according to ISO 9001 and later EN 46000.

Our early certification by well respected notified bodies. Such as BVQI was the first step towards gaining the right to CE label our products from the very moment EEC with medical devices agency (MDA) went into effect in 1995. The strategy was successfully completed and the CE certifications process was carried through on schedule.

As the result Acme was among the group of those companies in the world to be granted permission to CE - label its products.

Today Acme as organized quality assurance work to fulfill the needs of both customers and public authorities in an appropriate manner.
