Laparoscopic
LIVER RETRACTOR

NATHANSON RETRACTOR SYSTEM

NATHANSON

The Nathanson system allows the surgeon to hold the entire liver. It is used primarily in Gastroesophageal Reflux Disease procedures, but can also be used in a wide range of laparoscopic surgeries. With the additional accessories, it extends it's supporting features for open surgeries, even for larger or bariatric patients. The retractor system is available as a laparoscopy set, each open surgery item can be ordered separately.
